I'm a motion graphic designer, and love all things moving whether on TV or on the Web. I worked for nearly two years in post production, first as a runner, before becoming a Digital Intermediate, a role that involved QC-ing, conforming, & playing out feature films for HD, film, & TV, & heightened my attention to detail. Since the turn of 2008 I have been an independent designer, animator & editor, seeing briefs through from pitch to delivery.
